UTD	**Course**	**CS 4390 – 0W1 Computer Networks**
	Professor	Dr. Kamil Sarac
	Term	Spring 2026
	Meetings	MSTeams on Monday/Wednesday 1:00 pm to 2:15 pm

Professor's Contact Information

Office Phone	972 883 2337
Other Phone	n/a
Office Location	ECS South 4.207
Email Address	ksarac@utdallas.edu
Office Hours	9am to 10am on Friday (in person); by appointment (online)
Other Information	Course web page: http://www.utdallas.edu/~ksarac/cn/

General Course Information

Pre-requisites, Co-requisites, & other restrictions	CS 3345 is pre-requisite; working knowledge of a UNIX-based operating system will be helpful
Course Description	This course is an introductory course on computer networks. Using the Internet as a vehicle, this course introduces the underlying concepts and principles of modern computer networks with emphasis on protocols, architectures, and implementation issues. The main goal of this course is to understand layering in computer networks, understand different protocol stacks (OSI and TCP/IP), understand functions and protocols within a layer, understand how layers fit together and finally understand how the Internet works. In addition, you will also experience with (i) writing simple network applications and (ii) learning exactly what is going on inside the Internet by looking at frames/packets/segments and identifying each bit. Course catalog description: **CS 4390 - Computer Networks** (3 semester credit hours) The design and analysis of computer networks. Topics include the ISO reference model, transmission media, medium-access protocols, LANs, data link protocols, routing, congestion control, internetworking, and connection management. Credit cannot be received for both courses, (CE 4390 or CS 4390) and EE 4390. Prerequisite: (CE 3345 or CS 3345 or SE 3345) or equivalent. (Same as CE 4390) (3-0) S
Learning Objectives	Ability to understand the need for and structure of the OSI, TCP/IP network models Ability to understand and evaluate different error detection schemes Ability to understand and evaluate stop-and-wait, sliding window protocols Ability to understand and evaluate multiple-access protocols Ability to understand and evaluate routing protocols Ability to understand and evaluate flow control and congestion control protocols Ability to understand the various Internet protocols (TCP/IP) Ability to implement networking applications

Required Texts & Materials	Computer Networking, A Top-Down Approach, 8th edition by James Kurose and Keith Ross

Assignments & Academic Calendar

TBD	Exam 1
TBD	Exam 2
TBD	Exam 3
TBD	Project due
Please see the course schedule page at www.utdallas.edu/~ksarac/cn/S26.CS4390.Schedule.htm for more details	

Course Policies

Grading (credit) Criteria	Quizzes: 10% Three Exams: 20% (each) Programming project: 20% Four Assignments: 10%
Make-up Exams	No make-up exams unless in case of an emergency situation such as health emergency or similar un-avoid-able situations and you need to provide convincing documentation for it.
Extra Credit	n/a
Late Work	No late work accepted
Special Assignments	n/a
Class Attendance	Required
Classroom Citizenship	Class participation in terms of asking questions is highly encouraged. Please do not hesitate to ask questions no matter how simple you might think the answer could be. This type of interaction helps improve the effectiveness of the class and breaks the monotony.
UT Dallas Syllabus Policies and Procedures	The information contained in the following link constitutes the University's policies and procedures segment of the course syllabus. Please go to http://go.utdallas.edu/syllabus-policies for these policies.

The descriptions and timelines contained in this syllabus are subject to change at the discretion of the Professor.
